Antistatic wristband

(Product name)

AS2N

(Product identification)

Manufactured / imported by:

VELLEMAN NV.

Legen Heirweg, 33

9890 Gavere

Belgium.

When soldering and working on electronic devices, a clean and safe work environment is more important than one might think. Velleman offers a large choice of high-quality ESD accessories for the DIYer, hobbyist and professional. This adjustable wristband is worn around the wrist and protects against static electricity when working on electronic devices which are prone to static discharge. A must when working on PCs, electrical installations and other sensitive electronic components.

Specifications

Primary colours Black
